

# VIRTUAL PRIVATE CLOUD SEEWEB FOR SAP HANA

The private cloud infrastructure for your HANA environments

## Virtual Private Cloud for SAP HANA: what is it?

Seeweb's IaaS solution for SAP HANA is the **private cloud** service that enables you to get virtual machines on certified or supported **SAP** hardware.

### Main use cases

- Managing SAP S/4HANA platforms in cloud environments;
- SAP workload management leveraging the flexibility of the underlying platform;
- Creating a geographical disaster recovery environment
- Compliance with specific, high security standards and legal policies.

## Seeweb's VPC for SAP HANA

It's the perfect private cloud for SAP partners and ERP integrators looking for an established partner.

Our server farms, located in strategic points of Europe, allow us to offer you:

- IT infrastructure robustness
- A reliable and redundant network system
- Unlimited provisioning opportunities
- Proactive anti-DoS protection

Our resilient and flexible technology, projected for helping organizations to automate and manage their processes, offers:

- Two computational nodes, with the latest dual Intel processor and various RAM availability, starting from 256 GB
- 1 TB of full flash SAN (Storage Area Network) completely redundant
- Free VMware license up to 10 GB of RAM and a pay per use model for higher volumes
- As an option, an enterprise class security appliance that allows you to protect your infrastructure at the highest levels (Fortinet FortiGate)
- SAP certified hardware (*Cloud and Infrastructure Operations*)
- Operating system certified for SAP installations (Suse Linux or RedHat)
- HANA installation in BYOL mode (Bring Your Own License)
- Possibility of interconnection to private infrastructures

## Technology and people

For your SAP projects and for your needs to integrate management systems, contact our presales specialists that will help you design the best infrastructure with the benefits of:

- Energy efficient systems (DNSH compliant)
- Contractual flexibility
- Maximum support for infrastructure maintenance and stability
- Data security and compliance

## Presales support

Design your Virtual Private Cloud infrastructure for SAP can be easy with our professional presales support. Tell us your needs in terms of SLA and computing resources: our professionals are available to develop a personalized SAP Hana project for your company.
